Tips to ditch the space heater

Space heaters are energy hogs, and older models can be extremely dangerous. This winter, ditch the space heater and try these alternative solutions to stay cozy.

- ▶ Use an electric blanket to keep warm during the night.
- ▶ Caulk and weatherstrip around all windows and doors to prevent heat loss.
- ▶ Consider adding insulation to your attic and around duct work.
- ▶ Have your HVAC system serviced by a professional at least once a year to maintain its performance.
- ▶ Invest in a programmable thermostat. These can help you save money by automatically adjusting the temperature of your home during certain times, like when you are away during the day or asleep at night. That way your heat runs when you need it to, keeping you cozy!
